HOD ExTC

ONE PAGE REPORT

Title of Event : International Workshop (5G CONASENSE)
Guest : Directors, Principal and Heads of Various Institutes
Audience : Students from ViMEET, VCAAD, Design
Organized by : Department of ExTC Engineering
Coordinator : Prof. Sharad Wagh
Date : 26/09/2016 to 27/09/2016

Among the socio-technology domain, a very important integration strategy concerns communications, positioning & sensing systems. This integrated vision involves integration with new business opportunities able to merge three worlds, i.e., communications, navigation, & local/ remote sensing that have been apart for years. This vision is the focus to integrate the Communications, Navigation, SENSing & Services (CONASENSE) paradigm. In CONASENSE, Communications, Navigation, Sensing systems can mutually assist each other by exploiting a bidirectional interaction among them. The next generation communication systems will require the support of a variety of services & applications.

The subscriber will demand services at different locations having a seamless single subscriber entrance. This evolution demands an effective integration of communication networks as well as location-dependent services & context sensing for evaluating the situation. Therefore, there is need for a common platform aimed to the synergistic combination of technologies for communications, positioning & sensing systems able to effectively use information about location, context & situation of several entities. With its 1 Tbps data speed assurance, the 5G is about to emerge as a promising way to strengthen this adherence among the three worlds. The 25th GSSM is dedicated to provide platform in realizing CONASENSE in the 5G arena.

Subject: Letter of thanks giving.

Dear Sir,

We are very grateful to you, for sparing your valuable time for organising Industry Invited talk on Machine Learning". Your guidance will definitely provide right path to achieved knowledge. Your resourceful interaction with the student will definitely help them to gain there knowledge. We thank you once again for your full cooperation. Look forward for more such interactions.

Thanking you,

HOD EXTC
