Coordinator : Mrs.Deepali sunil Barad.
Date : 17/2/2022 to 24/02/2022

.....

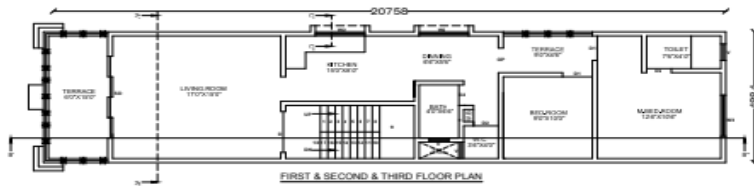

In this event students came to understand the concept of structural Engineering/ Drafting through software like **STAAD-PRO**. In first two days of this Value addition Programme, students were taught the basics of the software, next two days students were allowed to practice the software so that they can have hands on experience on this software, last two days trainer has allotted the projects to the students. Total 30 students has attended the VAP and successfully completed their training. Total 15 projects were given for batch (4 or 5 students) of students. They will exhibit the project during VAP project exhibition by end of this semester. Each batch of students will design a commercial complex and residential building using **STAAD-PRO** software

Trainer **Mr.Veekkas Paatil** has given excellent knowledge about the software and its industrial application. After this VAP students can design their own building and analysis the structure according to industrial expectation.
